

> Design & Production of Tooling Nayak Aircraft Service GmbH & Co. KG

External silencer for avionic cooling systems noise applicable at A/C B737 CL & NG

FEATURES

- > Significant Noise Reduction at the Avionic Extraction Valve
- > Everybody working in the Hangar during Avionics Maintenance knows about the noise exposure caused by the avionic extraction valve
- > This noise pollution may now safely be reduced by the silencer developed by Nayak's experienced engineers & technicians
- > Environmental friendly working in the hangar means more reliability and safety!

NOISE VALUES

B737 NG/CL	Distance 3 m
without silencer	101 dBA
with silencer	68 dBA

ADVANTAGES

- > Direct connection to avionic extraction valve on fuselage, so no positioning on ground needed.
- > Easy weight, easy handling
- > Little storage space

DIMENSIONS

- > Height 720 mm
- > Diameter 180 mm
- > Weight 3,8 kg

LEAD TIME

- > 1 week
