Nayak and AeroMates – Partnering to offer a full outsource solution for aircraft maintenance

A strong partnership for aircraft maintenance: On January 22nd, 2021, Nayak and AeroMates established a promising partnership. "In the future, customers will be able to obtain all aircraft maintenance-related services from a single source, thus shortening downtimes and ultimately reducing our customers' costs. We are pleased to be able to expand our portfolio in the "wheels and brakes" maintenance area," says Mr. Sauerland, Managing Director of Nayak. "Complete solutions for our customers are our main focus. Together with our new partner AeroMates, we can offer value-added savings for our customers, especially in these difficult times," the manager added.

Nayak, as Europe's largest airline-independent MRO with 47 maintenance stations in 16 countries and over 200 customers, is expanding its service portfolio to include a full-service MRO for wheels and brakes through its partnership with AeroMates. AeroMates operates in Niederkassel near Cologne in a 1,200m² state-of-the-art MRO store. "By working together, both resources and expertise are now optimally bundled to offer all customers high-quality and cost-effective solutions," says one of two managing directors of AeroMates, Mr. Grytsenko.

About Nayak

With currently about 700 employees in the MRO business, the Nayak Group offers its services at 47 European airports. The main focus is to provide full outsourcing solutions for our customers with a variety of technical services for the defence and civil aviation business. Currently Nayak has more than 200 contracted customers. Nayak is known for its Line and Base maintenance solutions and has its own Part-147 training organisation, which has just recently received the approval to conduct training courses for non-destructive testing.
